Download Manager Gold Crack Activator

Download Manager Gold For Windows 10 Crack 3.1.0 (143) was released on 24-Sep-2018, the software is freeware. It weighs 12.41 MB.Q: Update a document I'm using the following code to get the documents of a collection var cursor = db.getCollectionNames(); var cursor2 = db.getCollectionNames(); if (cursor.hasNext()) { var cursorNext = db.getCollectionNames().nextObject(); } if (cursor2.hasNext()) { var cursorNext2 = db.getCollectionNames().nextObject(); } I've inserted a new document in one of the collection, how can I update it? EDIT:

I've figured out how to update one document: db.collection.update({ "$id": { "id": 1 } }, { "$set": { "id": 2 } }, { upsert: true }, function(err, collection) { if (err) throw err; collection.find().toArray(function(err, results) { if (err) throw err; console.log(results[0]); }); }); How can I update a document with another id? A: You need to use the $set operator. The $set operation will not check if there is an existing document, so you should use this operator for situations where you want to add a new document (i.e. id = 1) or replace an existing document. db.collection.update({ "_id": id }, { "$set": { "_id": newId } }); A: If by update you mean that you want to add a new document, you can simply do: db.collection.insert(newObj); and if you want to replace the document, then you have to add a new parameter to the insert. A: It's possible to do it using Mongoose like this: 6a5afdab4c
