Ableton live Suite v9.5 WiN x86 x64-d33p57a7u5 full version To get the best possible experience when using our website, we highly recommend you upgrade to the latest version of Internet Explorer.Q: Python: No match found When I run the python code below, python displays the message "No match found" after the user input but the program works fine. How do I fix it?

```
print('Welcome! What would you like to know? ') print() question = raw_input('>>> ') print() if question.lower().find('math')!=-1: print('Mathematics') elif question.lower().find('latin')!=-1: print('Latin') elif question.lower().find('itengr')!=-1: print('IT') else: print('Nothing') print() A: How about something like this: print('Welcome! What would you like to know? ') print() question = raw_input('>>> ') print() if question.lower().find('math')!= -1: print('Mathematics') elif question.lower().find('latin')!= -1:
```
