The technology allows a player to use 'coaxial' control when sprinting to quickly and precisely control his movement while also reacting to incoming passes. Players can also instantly execute goal-setting techniques. An example of this is the cross-field pass in combination with a circular pass, which can be conducted in midair, meaning you are able to stay in the center of the field even if you are outside of the normal pass area. Fifa 22 Cracked Accounts introduces the new Backpass Control feature, which enables players to use an overhead pass to defend against an attacker. By pressing the Backpass button, the player is able to carry out a flick pass, which knocks the attacker off balance. Players can also use the Backpass feature to bring the ball forward or backwards. Players can gain additional control of their attacking play by lining up their run and shots. By pressing L2, players can instantly choose to execute the run, or they can choose to increase the height of their jump by pressing R2. Players are able to control the height of their jump by holding down the button. Players can also modify their run direction using RB and LW buttons. Pressing the Move button jumps the player, and pressing the Shoot button allows a player to utilize a new Dual Move feature. In Dual Move, players can execute short runs. By pressing the move button again, players can add a short pass to the move by pressing the Left Analog Stick. Players can also make a small hop by pressing L2 + Move. Key Features Include: 22 FIFA Masters – players will return to their favorite clubs as Masters, with their favorite kits and jerseys included in the game. Goalkeepers will see a heightened sense of responsibility, as they now have to communicate more with their defense. Players must make smarter decisions, as the quality of crosses into the box is increasing. New Referee Guide will provide players with helpful tips on how to control the referee's game and how to communicate with the referee. Expanded Transfer Scout System New Transfer Guide helps players prepare before the big summer window. Players can use Transfer Guide to set up formations and tactics, which can be changed at any time during the game. At the start of a new transfer window, players can set up their team, including new formation and tactics. They can also easily revisit their team setup during the transfer period, with the ability to hide and show features
