- Field of the Invention This invention relates to the field of wheeled luggage, and more particularly to the lifting and carrying of large, heavy luggage.
- Description of the Prior Art The carriage of luggage, particularly the carriage of luggage by hand in a manner to avoid undue strains on the individual carrying the luggage, has always been an important consideration in the design of luggage. To this end, large luggage has usually been designed to take advantage of the weight of the luggage, especially when the luggage is of a cylindrical configuration. For example, U.S. Pat. No. 1,785,933 discloses a cylindrical suitcase, which is constructed so that it is relatively stiff, allowing for a relatively deep loading of the suitcase. As another example, U.S. Pat. No. 2,007,920 discloses a luggage case of lightweight rigid construction, with a recess for receiving a flexible bag. This arrangement provides a degree of reinforcing for the luggage case, but still allows the case to be relatively light and hence easy to carry. U.S. Pat. No. 2,902,384 discloses a luggage case having a generally cylindrical shape with a recess for receiving a flexible article. The luggage case has a relatively deep side wall, and a plurality of reinforcing panels located at the side and end walls, so as to increase the rigidity of the case. A similar luggage case is disclosed in U.S. Pat. No. 3,662,537. The luggage case of this invention includes a bottom and vertical side walls, with a recess for receiving a bag. The bottom and side walls are reinforced at the edges with rigid reinforcing elements. U.S. Pat. No. 4,961,565 discloses a suitcase having a number of vertical support members

social interactions. Do you have any sources on the bands' dates? Rocklahoma also added the Queens of the Stone Age shows to their schedule beginning in Las Vegas, so an earlier week for a weekend and a later week for a Monday show is not unheard of. Jerry, not offense but fernando and extx have every reason to bring their game to your event if they feel their day is better than yours. Don't feel guilty about what you do each year. Feel and deserve it! ? This year I was looking forward to seeing The Killers and getting it all captured for fans who missed the show. But from what we understand, the group's icky bassist and horny drummer have both been getting sexual health checks. After a negative biopsy and Ms. Carney's wife being diagnosed with cancer, - the Killers canceled their summer tour, but are back to work on their next album. I haven't seen a word about other shows being added, so I am cautiously optimistic they will have the balls to play in N. Texas again. If by some chance that happens, I'll be sure to set my alarms and hit the EZ!
Extruder An extruder is an industrial machine that forms a polymer by undergoing continuous plastic deformation that reduces the original granular matter or powder to a good solid shape. Extruders are broadly classified into single screw and twin screw rotating type (high pressure or low pressure operation). The screw is usually a metallic or ceramic rod that is turned at constant speed inside a variable-diameter barrel. Plastic mixed with the feed material is melt and then extruded through a die positioned at the end of the barrel

① The second wave begins: The galactic civil war resumes! In a far-off corner of the galaxy, a rift is opening up, leading to the abyss. The rising star is not large, but it is growing rapidly. With a speed of one kilometer per second, there are monsters that the abyss can match, and you are faced with a war that cannot be ignored. ② The defence line starts: I am not entirely sure of what's waiting for us, but I'll take care of the mines and try to build up an earthship. As for the battleship, it should be in the bottom-left corner to support the earthship. ③ The tanks in the sky: Well, how is this battlefield? You can see the number of enemies over there, and you'd better watch out for that underling. They have changed their method of attack and are more like infantry than tanks. If you encounter it, you'd better switch back to the main battle screen to recover before the underling catches up with you. ④ The upgrade: On the bottom-right corner, if you put it into top speed, it'll take longer to travel, but it will deal a lot of damage, and it will also be much easier to dodge. Also, the underling will be caught by surprise and will suffer. ⑤ The earthship: On the bottom-left corner, an earthship is in danger of being crushed, but you can still control its movement. If the earthship runs away to avoid the monsters' attack, then the combat will stop temporarily. If the earthship's destroyed completely, the battle will end for good. ⑥ The battleship: On the top-right corner, the battleship can easily escape the abyss wave, but it will take a long time to travel, and if it gets blocked by the abyss wave, it will suffer from damage. In this case, it will be better to get it into a nearby battle. The following document may not be reproduced, copied, or distributed in any form without permission from Evernote.
