SharePoint is a Microsoft Windows-based collaboration platform and web application. It is primarily used for teamwork and communication within organizations and is integrated with other software products. It is a platform that integrates work, people, information and processes. SharePoint can be installed on Windows 2000 Server and Windows Server 2003, along with the Windows Server 2008 operating system. SharePoint 2007 and SharePoint 2010 are based on the .NET platform, but SharePoint 2013 is based on the Microsoft Office Open XML platform. Siri has been the default personal assistant on the iPhone since 2011. iPadOS (iOS 12) is Apple's operating system for tablet computers, primarily tablets such as the iPad. Microsoft Surface is a tablet computer device. Android Auto was an Android-based software product developed by Google. It allowed for hands-free operation of Android applications by voice commands. It was released in October 2015 and discontinued in April 2017. Motorola's Android-based Moto X Style runs Android 7.0 "Nougat" as its default mobile operating system. Virtual reality (VR) is an emerging computer technology which aims to immerse the user in a virtual reality environment. It provides users with the ability to interact with the virtual world in ways that are not possible with conventional input devices, such as computer mice and keyboards. Applications include interactive games and educational exercises, as well as telepresence, in which a user can appear as if they were present at a location, meeting, or in a virtual classroom setting. Healthcare Healthcare is the delivery of healthcare and medical services. Healthcare services include professional medical and nursing care as well as maintenance and monitoring of equipment and the provision of medical services. Healthcare also includes the prevention of illness or injury. These preventative services are

known as primary healthcare and are offered by health practitioners, primary health centers, and by the public sector as well as private sector health insurance in developed countries. In many industrialized nations, individuals are expected to help maintain their health by engaging in healthy behaviors, such as being physically active, maintaining a healthy diet, and not smoking. Thus, primary healthcare services may be considered preventive medicine, in addition to being medical treatment. In the United States, primary care refers to a broad range of medical services such as medical home, walk-in clinic, and urgent care. Healthcare in the United States and Canada is largely delivered through a system of public and private health insurance. There are six types of public health insurance in the United States: af5dca3d97

Electrochromism is a phenomenon where a material exhibits a reversible electrochemical response to an applied potential. Electrochromic devices utilize this reversible electrochemical response to regulate the transmission, reflection, or absorption of light by the electrochromic device. For example, electrochromic devices can be utilized for energy control in buildings, digital paper, windows, displays, mirrors, eyeglasses, sun glasses, and the like. The electrochromic properties of a material are most effective at an absorption wavelength corresponding to the conduction band of the material. A conventional electrochromic device
